The **BHS Bag Breaker®** opens bags at high volumes without damaging content, ensuring maximum recovery of valuable recyclables. The patented Bag Breaker® uses large, counter-rotating drums to efficiently open the bags and release the contents, discharging them from the bottom of the machine. Bags are torn into large pieces for easy removal.

Bagged material can be fed directly into the BHS Bag Breaker® with an infeed conveyor to achieve an evenly-metered flow rate.

- Clean-out doors on two sides for easy access and maintenance
- Easy to retrofit into existing facility
- Opens bags without damaging valuable recyclables
- Bags are torn to large pieces rather than shredded for easy removal
- Heavy-duty construction for decreased downtime and long-operating life
